MAGAZINE

A woman with a large, wide-brimmed brown hat is holding a young child with blonde hair. They are standing in a field of yellow flowers. Another child is visible in the foreground on the right.

Summer mindfulness

Living for the moment. Changing attitude and state of mind, by being attentive to oneself and others.
Being in the here and now.

DECOR

Do It Yourself

With Made By You, N°74 recommends patience and proposes a range of hands-on activities. Knowing the satisfaction one obtains from crafting things oneself, we can thank the brand for offering us a little inner serenity. N°74 grew out of a taste for handiwork - knitted, crocheted, embroidered, woven - and a desire to imagine beautiful children's bedrooms that will feed their dreams. Made By You is an extension of this, because it seeks to share creativity. The School Posters kits recall the charts once pinned up on classroom walls, illustrating families of fruits, animals and vegetables. They include the printed cloth to be embroidered by you, threads, hoops, instructions, etc. Stitch away patiently and watch your patterns grow: either protean fauna and flora or the wonderful insects pictured here. DESIGN

Bedroom metamorphosis

Though different versions of the Camelot bed system already existed - one bed, two beds, bed and desk, complete with storage space and the possibility of upholstering the sides, the 2019 version presented at the Milan Salone del Mobile, has even more

options. Rather like a Swiss army knife with multiple functions, it can now be assembled as bunk beds, with stairs to the upper bed in the form of a bookcase. It also comes in a pink and red version with plaid fabric on the sides, as shown here. (H.L.) nidi.it
